

ONE STOP SHOP

Many traditional dental implant procedures require multiple visits to multiple doctors, each with their own rates. At Mady Dental, everything is done under one roof with one fixed cost.

QUICK RESULTS

Thanks to the All-On-Four procedure and encompassing approach, patients can leave with fully functioning teeth in just one day. After the implants heal, patients return to complete their permanent smiles with fully functioning, beautiful teeth in one day.

RELAXED, COMFORTABLE TREATMENT

Sedation dentistry helps minimize discomfort. Unlike the traditional approach that uses local anesthesia, we use full IV sedation to ensure your experience is as comfortable as possible.

A PERMANENT SOLUTION

One, final solution that can last a lifetime with proper upkeep. Options like bridges, crowns and dentures typically only last anywhere from 5-10 years. Dental implants are the only lifetime solution to missing or damaged teeth.

LOOK & FEEL NATURAL!

Dental implants look, feel and function just like your natural teeth. Soon after your treatment, you'll be able to eat your favorite foods once again. You'll laugh more, smile more —just as you would with natural teeth.
